The Intelligent Room

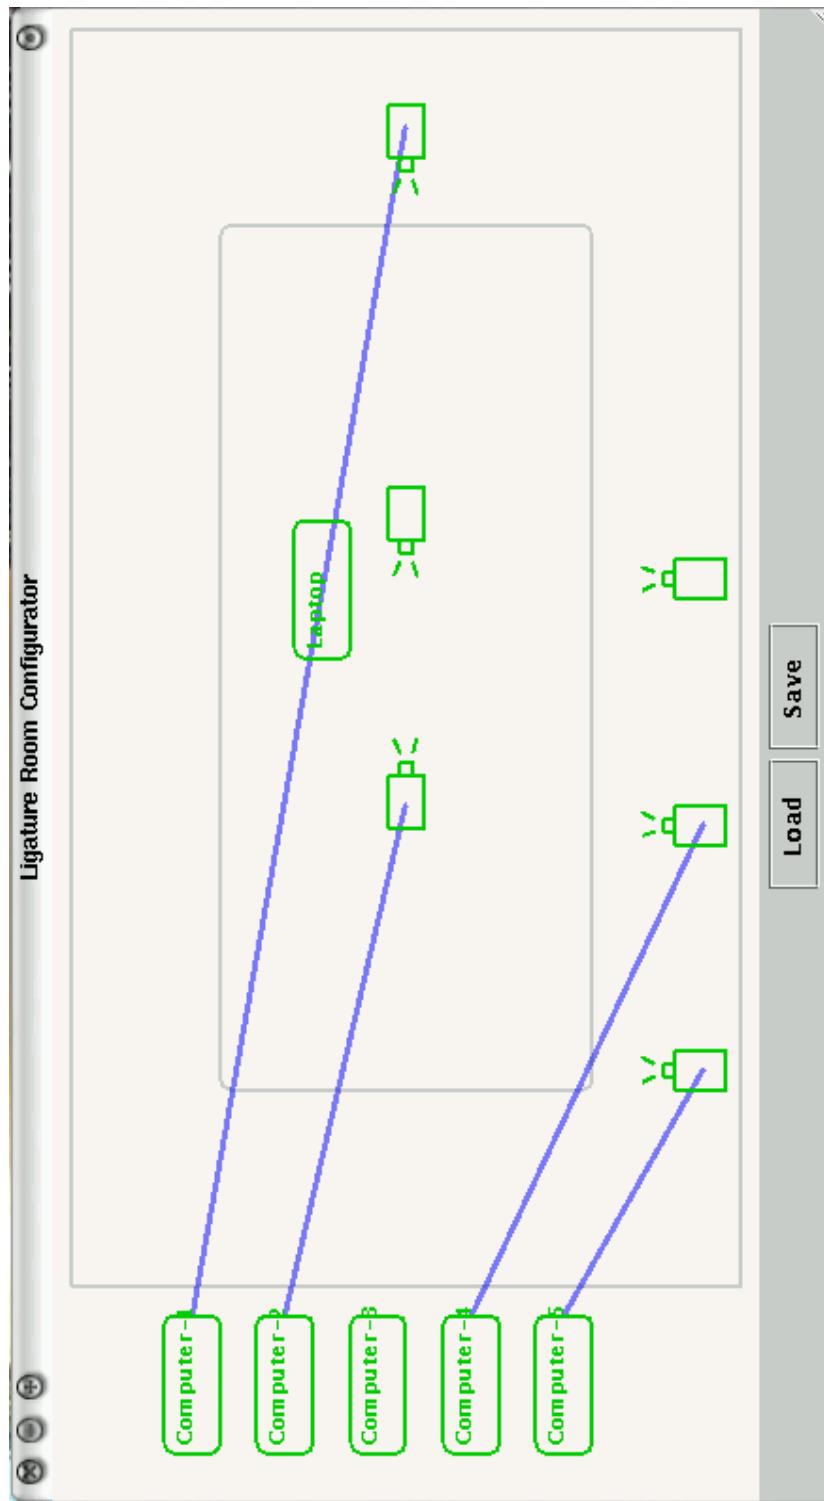

Ligature

Why Ligature?

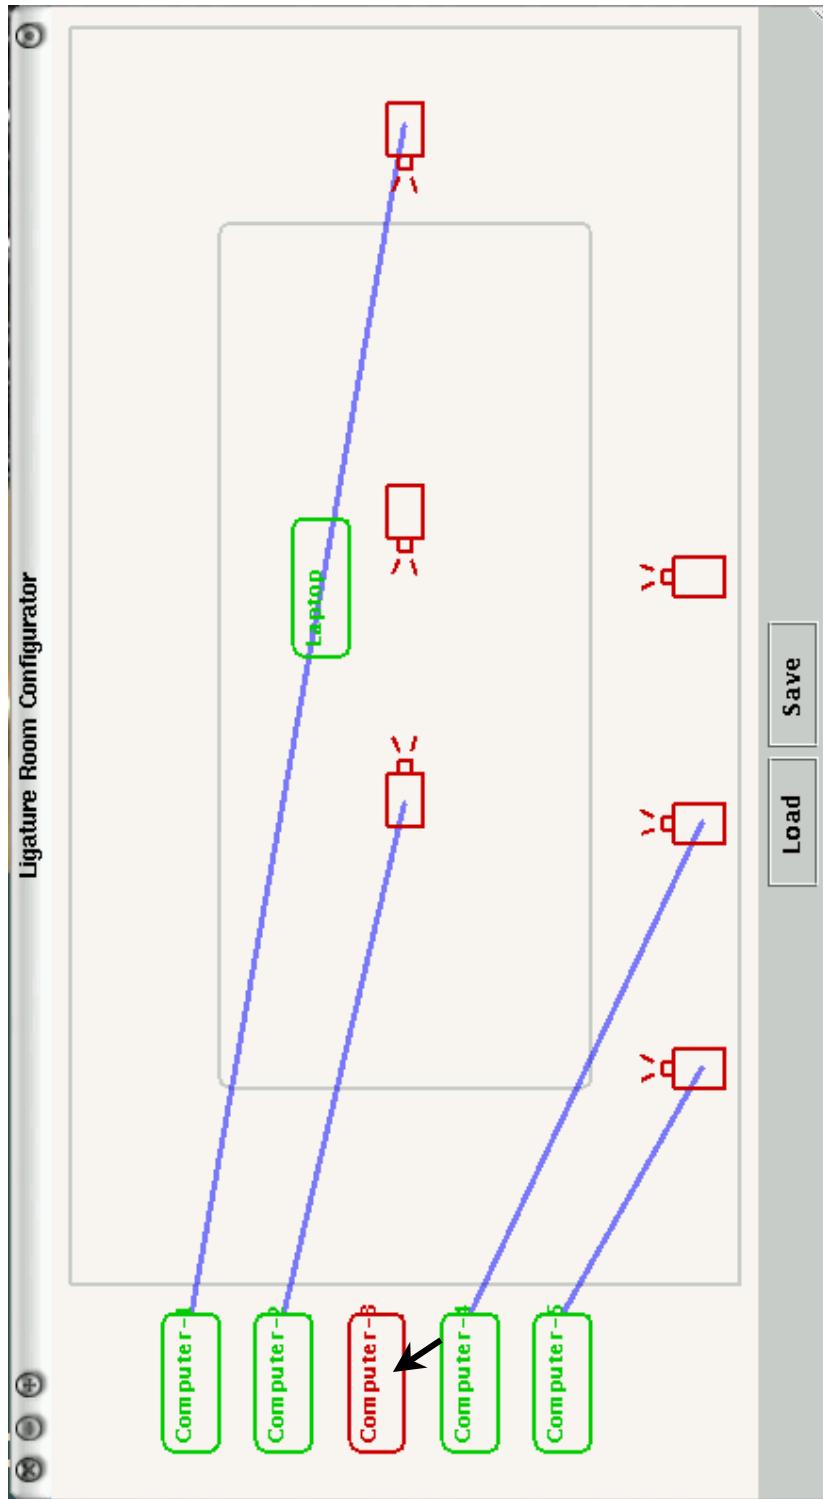

- Need for user customization of environment
- Make current state visible
- Single-stroke gestures to control
 - Consistent
 - Direct-manipulation
- Saving and restoring preferences

Visualizing the state of the environment

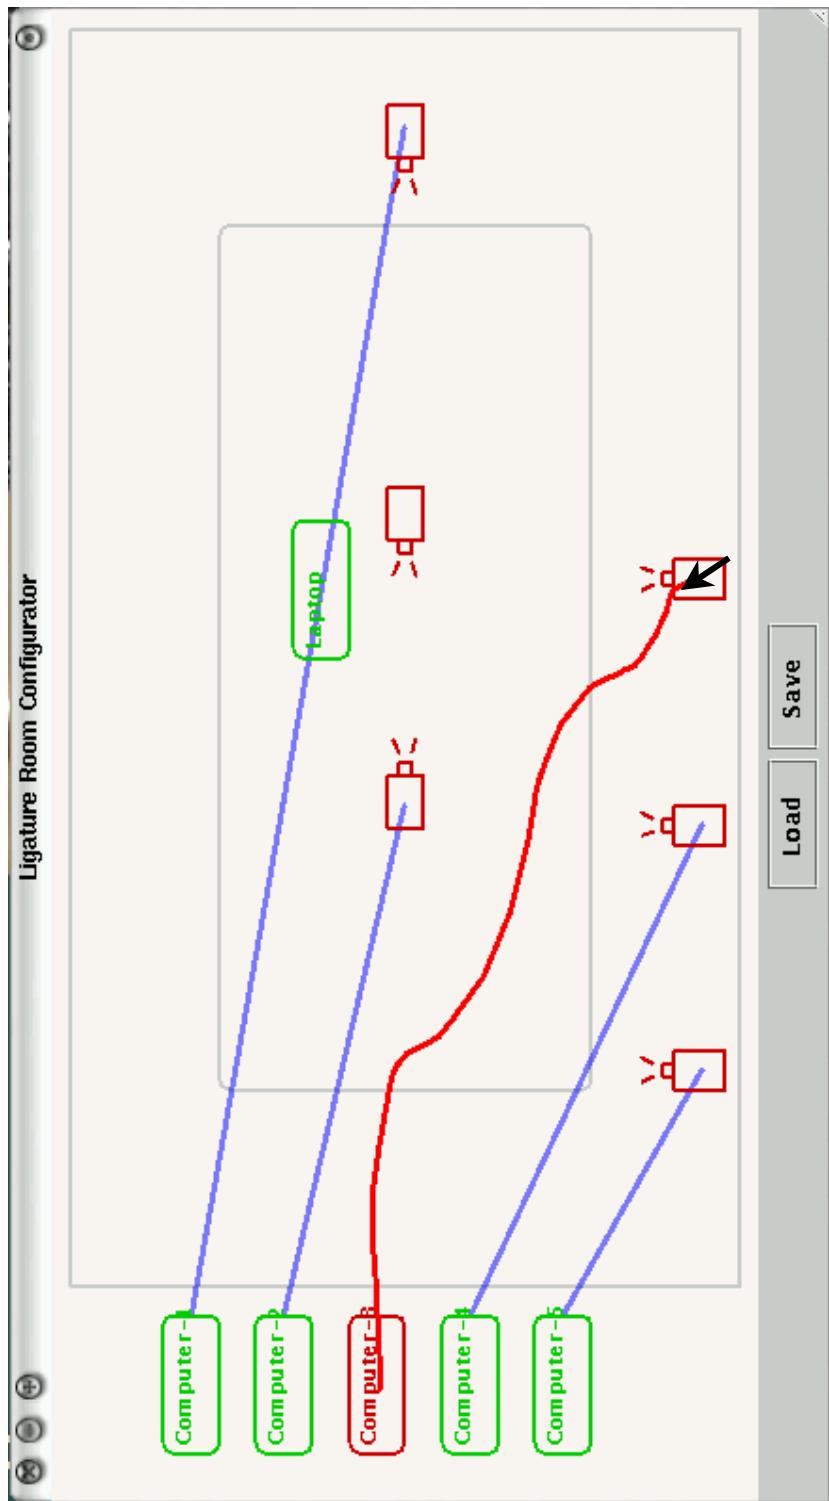

Devices are sources and sinks of signals of various types

Ligature ↔ Metaglue

Effect user actions via resource manager

Future Work

- Devices with state
 - lights
- Usability study
 - Projectors vs. displays: what's the right ontology
- Extend the connection metaphor
 - Moving information among services, applications, and workspaces
